

nd of the Blue Dolphins ,Book re

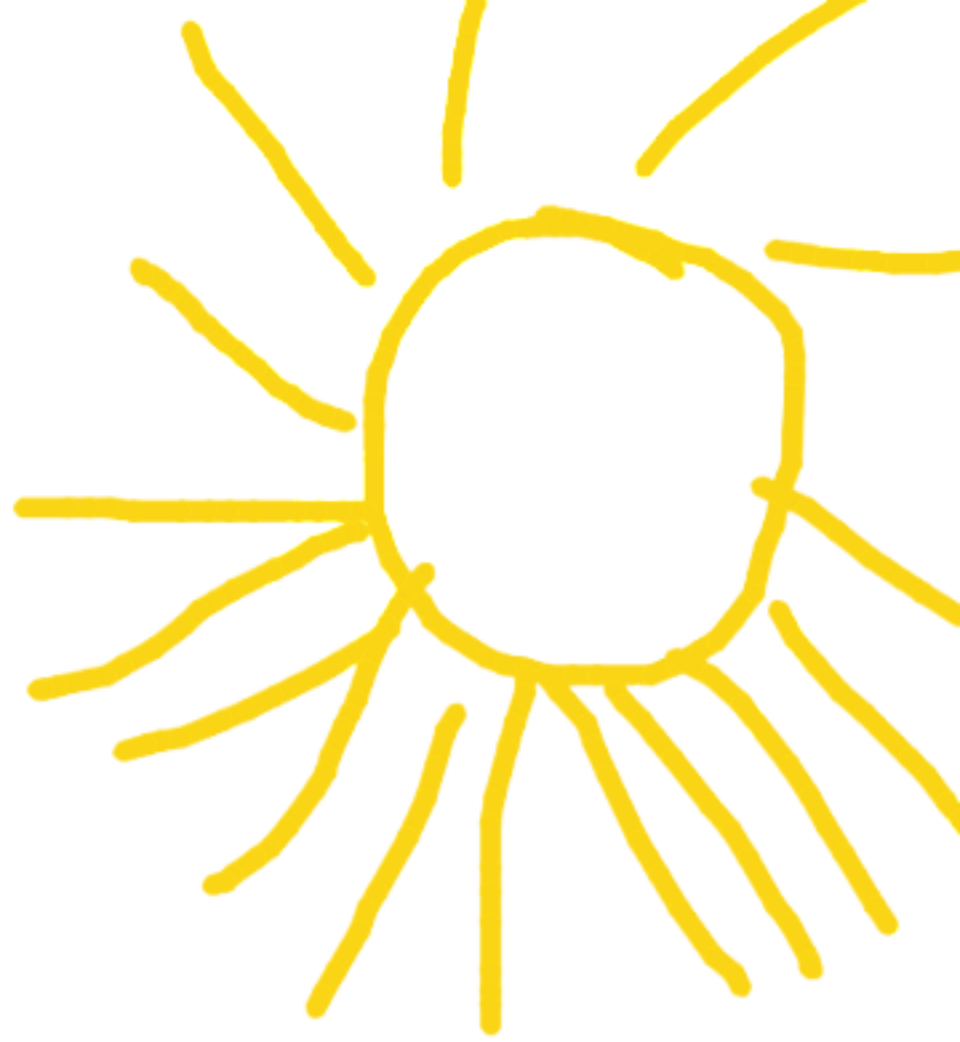

Written and Illustrated by Ethan

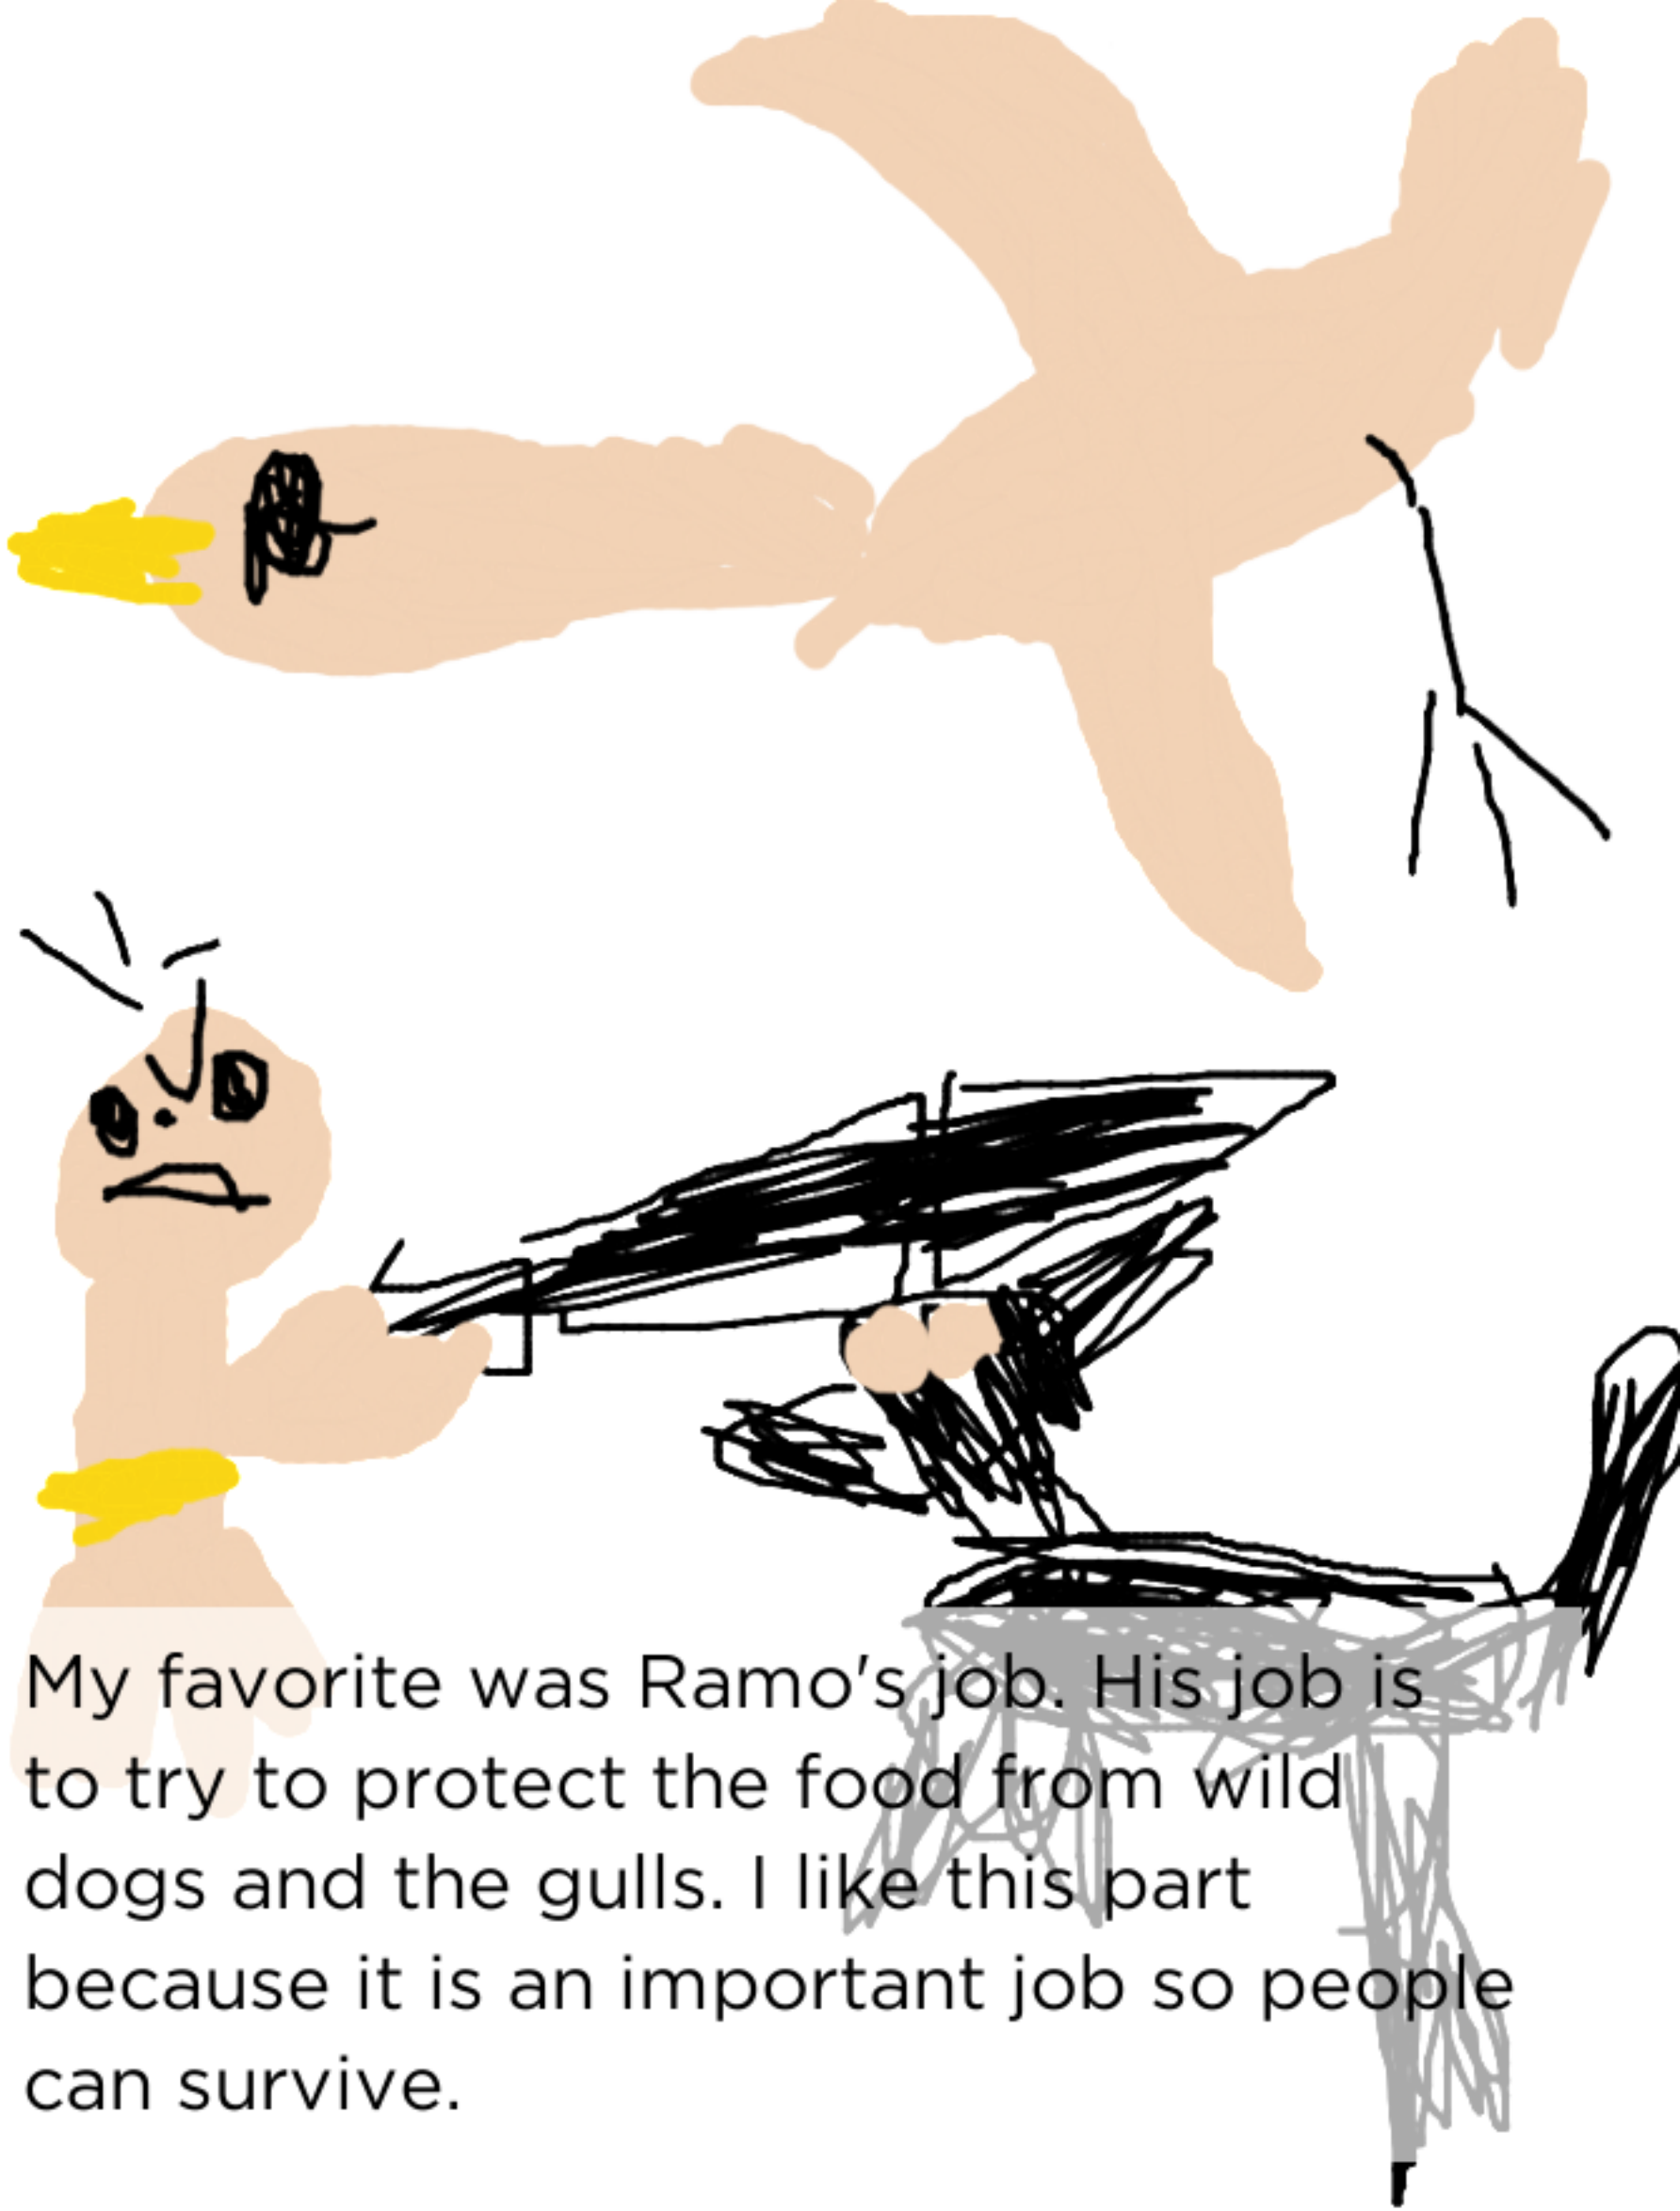

In the beginning Captain Orlav wants to hunt otters on the island. He wants two pices of otters and chief gets one pice. The chief doesn't agree because it is not fair. The captain agrees to share otters half and half. They didn't stick to the agreement and got in a huge fight. The Aluets killed the Indians with their cannon.

In the middle Karana climbs a rock and stays there to protect herself and her food so the wild dogs don't get to her.

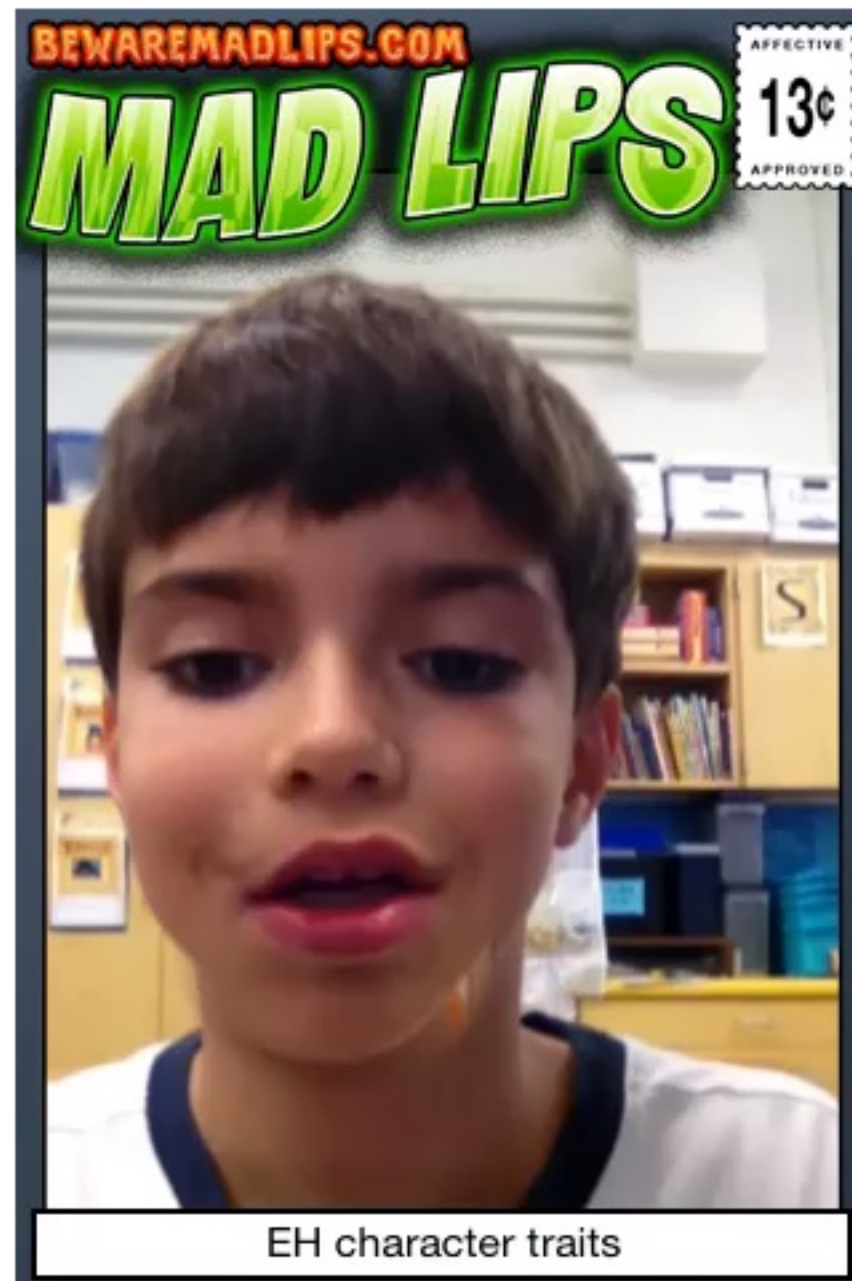

At the end of the story Karana finds a otter in the sea. She named the otter Mona-nee. Karana tries to feed her every day with fish she caught. She becomes friends with the otter.

My favorite was Ramo's job. His job is to try to protect the food from wild dogs and the gulls. I like this part because it is an important job so people can survive.

My least favorite part was Rontu dying. It was sad. Karana wants him to be alive. She gets a new puppy that looks like Rontu.

I am very creative.

This book is about the past of Karana.
