

# Flat Ethan

Written and Illustrated by Ethan

I was walking down the street. An asteroid came out of nowhere rolled on top of me and squish!

The asteroid flatten me.

The best thing of being flat is that I can fly.

Flying is fun to me because you can flip in the sky.

Being flat is not always fun. The bad thing of being flat is some people can think I am paper and staple me accidentally. If I were to get stapled it can hurt.

I like making flat Stanleys to send to people

.

This book is about me being flat.
